Morocco is the 5th largest African economy with a GDP of \$ 109.71 billion. In terms of contribution to GDP, the services sector is the major contributor. However, the primary sector is the largest employer in the country. Mining, a subsector of the primary sector, is a vital source of forex revenue for Morocco. The processing industry and light engineering dominate the industrial sector.

Trade with Pakistan has been in Morocco's favor in the last five years. In 2018, Morocco's exports to Pakistan reached an all-time high of \$ 347.43 million while imports from Pakistan were valued at USD 35.82 million. The untapped potential trade reveals that bilateral trade between them can go as high as \$ 9.67 billion for the top-25 products alone. If this potential is to be realized by either country, both nations would need to work on diversifying their export portfolios.
