

Job Description for Analyst (fisheries)

1. Conduct comprehensive market research to identify trends, opportunities, and challenges in the fisheries sector, both locally and internationally.
2. Assist in formulating and implementing policies aimed at enhancing trade in fisheries products.
3. Collaborate with government agencies, industry stakeholders, and exporters to facilitate dialogue and partnerships.
4. Develop strategies to promote fisheries products in international markets, including participation in trade fairs and exhibitions.
5. Ensure that fisheries practices comply with national and international standards and regulations.
6. Prepare detailed reports and presentations for stakeholders, including recommendations for improving trade performance.
7. Identify opportunities for sustainable development and export enhancement.
8. Provide strategic recommendations for policy and program improvements.
9. Conduct a comprehensive analysis of the fisheries value chain.
10. Evaluate existing fisheries management practices and compliance with international standards.
11. Identify key markets for Pakistani fish and seafood products.
12. Develop a strategic plan for capacity building and sustainable practices in the sector.
13. Facilitate stakeholder consultations and workshops to gather insights and foster collaboration.
14. A detailed report on the current fisheries landscape, including challenges and opportunities.
15. A market analysis report highlighting potential export markets.
16. Strategic recommendations for policy and management improvements.
17. A capacity-building plan for stakeholders in the fisheries sector.
